SUMMARY

Data and financial analyst with a track record leading quantitative investment diligence for \$60M+ in capital deployments and building AI enabled tools that cut underwriting workflows in half. UC Berkeley and Education Pioneers Fellowship alumnus, currently pursuing an MS in Data Science at Monroe University to build advanced machine learning, statistical computing, and applied analytics skills, with a focus on data driven security and risk detection.

EXPERIENCE

Analyst, School Lending & Outreach | Equitable Facilities Fund New York, NY 09/2025 to 07/2026

- Placement through the Education Pioneers Impact Fellowship (approximately 9% acceptance rate); completed fellowship programming through July 2026 following an analyst placement at Equitable Facilities Fund from September 2025 to May 2026
- Evaluated investment opportunities by analyzing performance, growth, and financial sustainability, informing over \$60M in capital deployment decisions
- Led diligence workflows and produced investment memos synthesizing quantitative data and qualitative insight for cross functional stakeholders
- Built an AI enabled memo generation tool using historical data and documents, cutting drafting time by roughly 50% and improving analytical consistency
- Structured and streamlined access to key datasets, improving the speed and quality of investment decision making
- Designed dashboards and internal tools across Salesforce, Tableau, Excel, and Airtable to track pipeline, surface insights, and support portfolio strategy

Assessment & Data Associate | Success Academy Charter Schools New York, NY 09/2024 to 05/2025

- Cleaned, validated, and analyzed large student assessment datasets to support instructional planning and leadership reporting
- Built recurring reports and dashboards giving school leaders timely, accurate student performance insight
- Applied AI prompting and automation to accelerate data validation and insight generation workflows
- Developed systems that improved data quality and reduced manual processing, increasing efficiency and reliability

Research Analyst | Earth Insight San Francisco, CA 05/2023 to 06/2024

- Built Python based data processing workflows that automated reporting tasks and cut reconciliation time by 30%
- Extracted, cleaned, and transformed large datasets to support reporting, analysis, and organizational decision making
- Performed spatial analysis in QGIS and integrated results into KPI dashboards to inform leadership of performance trends and gaps
- Created documentation, data dictionaries, and reporting guides that reduced onboarding time by 40%

EDUCATION

MS in Data Science | Monroe University New York, NY Expected May 2028

- Focus areas: advanced statistical computing, database management architectures, time series forecasting, and machine learning frameworks

BS in Environmental Economics & Policy | University of California, Berkeley Berkeley, CA May 2023

- Selected as a graduate level research assistant in development economics at the UC Berkeley Department of Economics, mapping and analyzing complex financial survey data

SKILLS

Programming & Data: Python (Pandas, NumPy), SQL, Advanced Excel (Macros/VBA), Airtable

Visualization & Systems: Tableau, Salesforce, QGIS (spatial analysis), CRM segmentation

Core Competencies: Quantitative investment diligence, capital deployment evaluation, financial modeling, generative AI workflow automation, data integrity and quality assurance, ETL and data reconciliation
