WORK EXPERIENCE

Equitable Facilities Fund (EFF) | New York, NY

Analyst, School Lending & Outreach | Ed Pioneers Fellow | September 2025 – Present

- Support screening and evaluation of charter school financing opportunities within a national pipeline of 160+ annual institutional lending prospects.
- Partner with the Principal of School Lending & Outreach to assess transactions exceeding \$60M in aggregate loan volume, supporting underwriting decisions.
- Prepare investment screening memoranda incorporating academic performance, enrollment trends, demographic analysis, and financial sustainability metrics.
- Analyze financial models to assess debt service coverage, liquidity (DCOH), repayment capacity, and operational risk indicators.
- Evaluate equity-focused indicators including Free & Reduced Lunch eligibility and low-income enrollment to support mission-aligned investment strategies.
- Manage pipeline data across Salesforce (AIM CRM), Tableau, and Google Drive; audit financial and operational datasets to reduce execution risk.

Co & Consulting, LLC (co&co) | New York, NY

Strategy & Operations Intern | June 2025 – September 2025

- Designed and deployed operational dashboards using Excel and Airtable to provide leadership with real-time KPI and pipeline reporting.
- Built automated workflows and API-integrated reporting pipelines, reducing data processing time by 50% and improving operational efficiency.
- Developed process documentation, workflow maps, and user stories that informed product and engineering updates.
- Partnered cross-functionally with operational and technical stakeholders to improve reporting visibility, workflow execution, and strategic planning.

Success Academy Charter Schools | New York, NY

Assessment & Data Associate | September 2024 – May 2025

- Built KPI dashboards and data visualizations using Looker and Excel to support instructional performance analysis and state compliance reporting.
- Automated data validation and reporting workflows through Excel macros, reducing manual work by 30%.
- Coordinated with regional data teams to identify reporting discrepancies, support root-cause analysis, and maintain accurate operational reporting.
- Authored SOPs, compliance documentation, and executive reporting materials that reduced month-end reporting delays by 25%.

Earth Insight | San Francisco, CA

Research Analyst | May 2023 – June 2024

- Conducted environmental and economic research focused on sustainability, climate-related trends, and regulatory analysis.
- Extracted, analyzed, and interpreted large-scale datasets to support predictive insights and strategic research initiatives.
- Developed scalable Python-based analytical tools and automation scripts, reducing quarterly reconciliation time by 30%.
- Performed spatial and quantitative analysis using QGIS; created internal data dictionaries and logic models to improve operational consistency.

Ruffalo Noel Levitz | San Francisco, CA

Intern | November 2021 – February 2022

- Supported donor engagement campaigns through CRM segmentation and multilingual outreach strategies.
- Applied scripting logic and campaign personalization techniques that increased donor engagement by 15%.
